# SERIAL PUBLICATIONS EXAMINED.

---

A list of serial publications examined in the course of the preparation of the "Review of Applied Entomology" was published in 1948 with the indexes to volume 35 of both Series A and B. A first supplement was printed separately and issued in June 1950. Many new journals have since come into existence whilst others have ceased publication and it has therefore been thought desirable to revise the list completely.

The Institute Library obtains, either by gift or exchange, most of the publications of a purely entomological nature and many others that contain a greater or lesser amount of entomological matter. There remain many that it does not receive, but the majority of these are available in libraries in the immediate vicinity. The disposition of those at present regularly examined is as follows :—

1. The Institute Library. These publications are prefixed by an (e) in the list.
2. The Library of the Royal Entomological Society of London, which is in the same building.
3. The various libraries housed in the British Museum (Natural History) at South Kensington.

Even in these extensive libraries there are still some publications not represented. These are to be found in other libraries in different parts of London, and they can be examined only at intervals and as time permits. They are all of a non-entomological nature, but do from time to time contain entomological articles. It is these that present the greatest difficulty and require a great deal of labour for comparatively little result. Although a certain number of papers from such sources are abstracted, some undoubtedly fail to be noticed. For this reason the publications in question have not been included in the present list, with the exception of a few of the more important that will be found prefixed by "o".

It is a pleasure to have this opportunity of acknowledging the unfailing co-operation of the librarians of the Royal Entomological Society of London and the British Museum (Natural History), who have not only given us every possible facility, but are also constantly drawing our attention to articles of entomological interest.

The arrangement of the present list is similar to that of its predecessor, issued in 1948, and calls for little comment. At the time of the earlier list, the future of several journals—particularly those of German, Austrian and Far Eastern origin—was obscure. They had ceased publication, at least temporarily, as a result of war conditions and it was not known if or when they would reappear. Such journals were prefixed with an asterisk. The position is now much clearer and consequently the number of journals so prefixed is very much less. Journals now marked with an asterisk refer to those the receipt or publication of which has been interrupted.

The insertion of the symbol (ent.) after the name of a publication means that the Institute Library either receives the entomological numbers only or retains only the papers on entomological subjects.

A complete revision of the present list will not be issued until there have been sufficient changes to warrant it. In the interval supplements will be issued as necessary to keep this list up to date.

We are very much indebted to those who send us reprints of their papers ; it would make our task very much simpler if all authors would adopt the practice of sending in reprints, particularly of articles appearing in non-entomological journals.

---

### SYMBOLS.

- \* A publication the receipt or publication of which has been interrupted.
- e A publication filed in the library of the Commonwealth Institute of Entomology.
- (ent.) Only the issues of entomological interest of the series are filed.
- o Publication examined irregularly.

Publications not prefixed by any symbol are those examined in the libraries of the Natural History Museum or the Royal Entomological Society of London.
